- Tamil
- Hindi

PROFILE

React developer with 3+ years of experience building scalable, responsive web applications with clean, efficient code and a strong focus on user experience.

PROJECTS

TELEWORK BRIDGE *(Ongoing 1.2-years Project)*

Tech Stack: React, Bootstrap, Node.js, MongoDB

- Built a simple and responsive platform for freelancers and clients.
- Created reusable React components and role-based user flows.
- Developed backend APIs using Node.js with MongoDB for data storage.
- Integrated payment flows with clear status and user feedback.

XLIM-CONNECT *(Ongoing 1-year Project)*

Tech Stack: React, Bootstrap, Node.js, MongoDB

- Built a responsive application for order, user, and inventory management.
- Created reusable React components with simple and clean state handling.
- Developed backend APIs using Node.js and MongoDB.
- Implemented role-based access to control features and views.

MOMMAS KITCHEN *(Ongoing 10-months Project)*

Tech Stack: React, React Native, Node.js, MongoDB

- Resolved UI and functional issues across web and mobile through effective problem-solving.
- Fixed bugs and improved component logic and state handling.
- Refactored existing React components to improve stability and performance.
- Supported backend fixes and data handling using Node.js and MongoDB.

JEWEL APP (AURUM) *(Ongoing 4-months Project)*

Tech Stack: React, Bootstrap, React Native, Node.js, MongoDB

- Developed a merchant and user management application for web and mobile.
- Enabled merchants to create and manage chit plans.
- Built user flows for browsing, selecting, and subscribing to monthly chit plans.
- Implemented role-based access and views for merchants and users.
